## Exploring the world of science with a visit from a scientist!

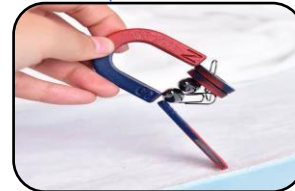

Dr Laura Lyon is visiting us to show the children different experiments and talk about her work when she worked in the science labs. She worked in medical research for 10 years before moving on to work for a global science company for a further 10 years which manufactures and distributes science products to all the researchers globally to enable them to make ground-breaking discoveries in research with their products.

Dissolving & colour mixing

Physics & exploring buoyancy

Exploring magnets & properties of materials

# Science Week

Surface tension

Seed germination in different environments

WMS science week is aimed at introducing the children to the exciting world of science. We want them to explore and learn throughout the week with an exciting agenda we have put together which we hope will inspire them and ignite their interest in science!

We hope you can provide the children with a lab coat so they can role play at being scientists for the week and get involved with all the science experiments! They can wear an old white shirt or if you would like to buy them a labcoat, there are lots of options on Ebay and Amazon!
